The new year is a time for new beginnings and hopefully more positive change. It is with this aspiration that the members of The Malaysian Psychiatric Association (MPA) and the Malaysian Child and Adolescent Psychiatry Association (MYCAPS) invite participants to attend our coming conference in August 2015. The committee hope with the program planned for the conference will help renew our commitment in our work with children and adults.

Every child in all parts of the world deserves to live in a safe and secure environment, and many professionals work with children and their families. Coming to the conference will benefit psychiatrists, paediatricians, primary care specialists, medical officers, general practitioners, nurses and medical assistants, other medical and allied health professionals, mental health caregivers and mental health activists from private, governmental and various non-governmental organizations, researchers and educators from various countries. The conference organizers have lined up a stimulating program to increase and renew knowledge, networking and resources.

Further information with regards to the congress visit us at: www.ascapap2015.com!

See you in Kuala Lumpur Aug 19-2, 2015!
